Note: By applying the dosage of our fragrance compound to the fractional values* (FV) you will be able to calculate the final classification of your product.

To determine the identity of the sensitising substances, please refer to the section 3 of the Safety Data Sheet (SDS).

For more details about the final classification you can refer to the official regulation 1272/2008/EC and its amendments.

Please find also a "guidance on the application of the CLP criteria", which provides multiple examples of calculation of fractional values for mixtures and for each hazard category: http://echa.europa.eu/documents/10162/13562/clp_en.pdf

* FV are defined by the "Concentration of the hazardous substances" divided by "the concentration limit related to the hazard category"
